Raised Scapes

Born with Designers in Mind

Overview

Created with designers in mind, Raised Scapes offers a variety of standard designs that are both convenient to order and easy to install.

For those seeking a personalized touch, we also provide customization options to perfectly match your vision. The result is a wallcovering that not only adds a refined texture and sophisticated design to any space but also delivers a soft, luxurious finish that elevates the ambiance of any room.

Raised Scapes was born
with designers in mind.

Design the space
you love.

Faster Lead Times

Easy to Order

Simple and Flexible Installation

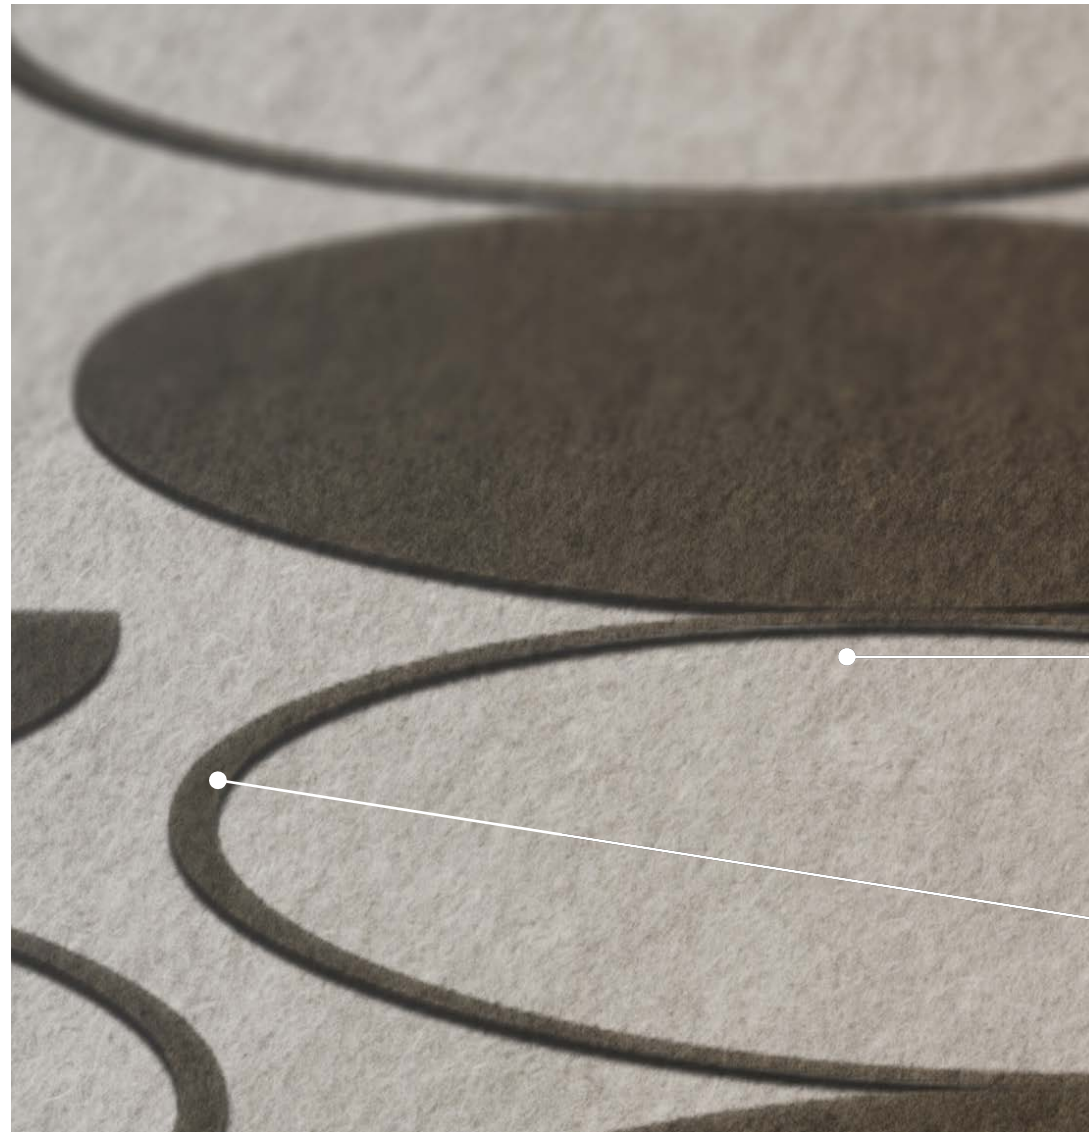

Customizable

The Basics

Raised Scapes wallcovering features premium 100% Wool Designer Felt, meticulously milled in Germany to ensure exceptional quality. When it arrives at our Toronto facilities, it undergoes a thoughtful transformation where each piece is carefully designed and precisely cut to bring our unique wallcovering to life.

The Details

Environmental **100% Wool Designer Felt**

- Biodegradable

- Oeko-Tex Standard 100 Product Class

Base / Background Layer

The solid background that holds the design in place

CNC / Foreground Layer

The more prominent level that provides depth and definition for the design

Cobblestones

Ordering Made Easy

Raised Scapes can be specified and put into production before the walls are even built! The standard width and the ability to be cut on-site allow for a straight-forward ordering process and flexibility during installation.

1. Share the rough dimensions of the space to figure out the number of panels needed as well as the approximate height— Not to worry, this will be tailored to fit during installation
2. Choose a design— We have many standard options to choose from (and more on the way!)
3. Select your color combination

You're all set!

This process allows for accommodating lead times and competitive pricing to get product to site when you need it.

A Great Fit for Even Your Larger Spaces

Raised Scapes panels are 34" wide and can reach up to nearly 10 feet in height, making them ideal for making a grand statement on expansive walls.

Soft Finish for Softer Sound

Adding a feature wall with soft finishes to your space, is an excellent way to help with acoustics. A perfect blend of form and function.

Design the Space YOU Love

We have many refreshing designs to choose from and we're working on more! Pick the design that best suits your space or chat with us about your custom ideas and incorporating branding as well.

Volumes

Phases

Design Flexibility

Some designs have several unique panel layouts which allow for different combinations. The design can act as a theme while maintaining a fresh and distinctive look in multiple areas — especially when using different color combinations!

Color Combinations to Fine-Tune Your Feature Wall

Raised Scapes can be produced in different color combinations to fine tune how much attention you want out of your feature wall. Tone-on-tone for subtlety, high-contrast for more definition, or a pop of color to bring the wall to life, setting the tone and matching branding themes within the space.

Stripes

Ease of Install

Installed like wallpaper relying solely on subtle vertical seams, the panels can be installed edge-to-edge easily and trimmed to fit true site dimensions. Installers will love the flexibility of Raised Scapes and the forgiving nature of our 100% Wool Designer Felt.
