100% Wool Felt: Made to Feel

Generations of Experience;  
Modern Solutions.

Made to Feel.

# Overview

Interior Felt manufactures 100% wool felt that is made to feel. By creating and selling this premium, natural product, we strive for a more ethical and sustainable design industry. Many of the world's leading architects and designers have chosen our signature product, Wool Designer Felt, to enhance all kinds of spaces, from corporate offices to retail environments to libraries.

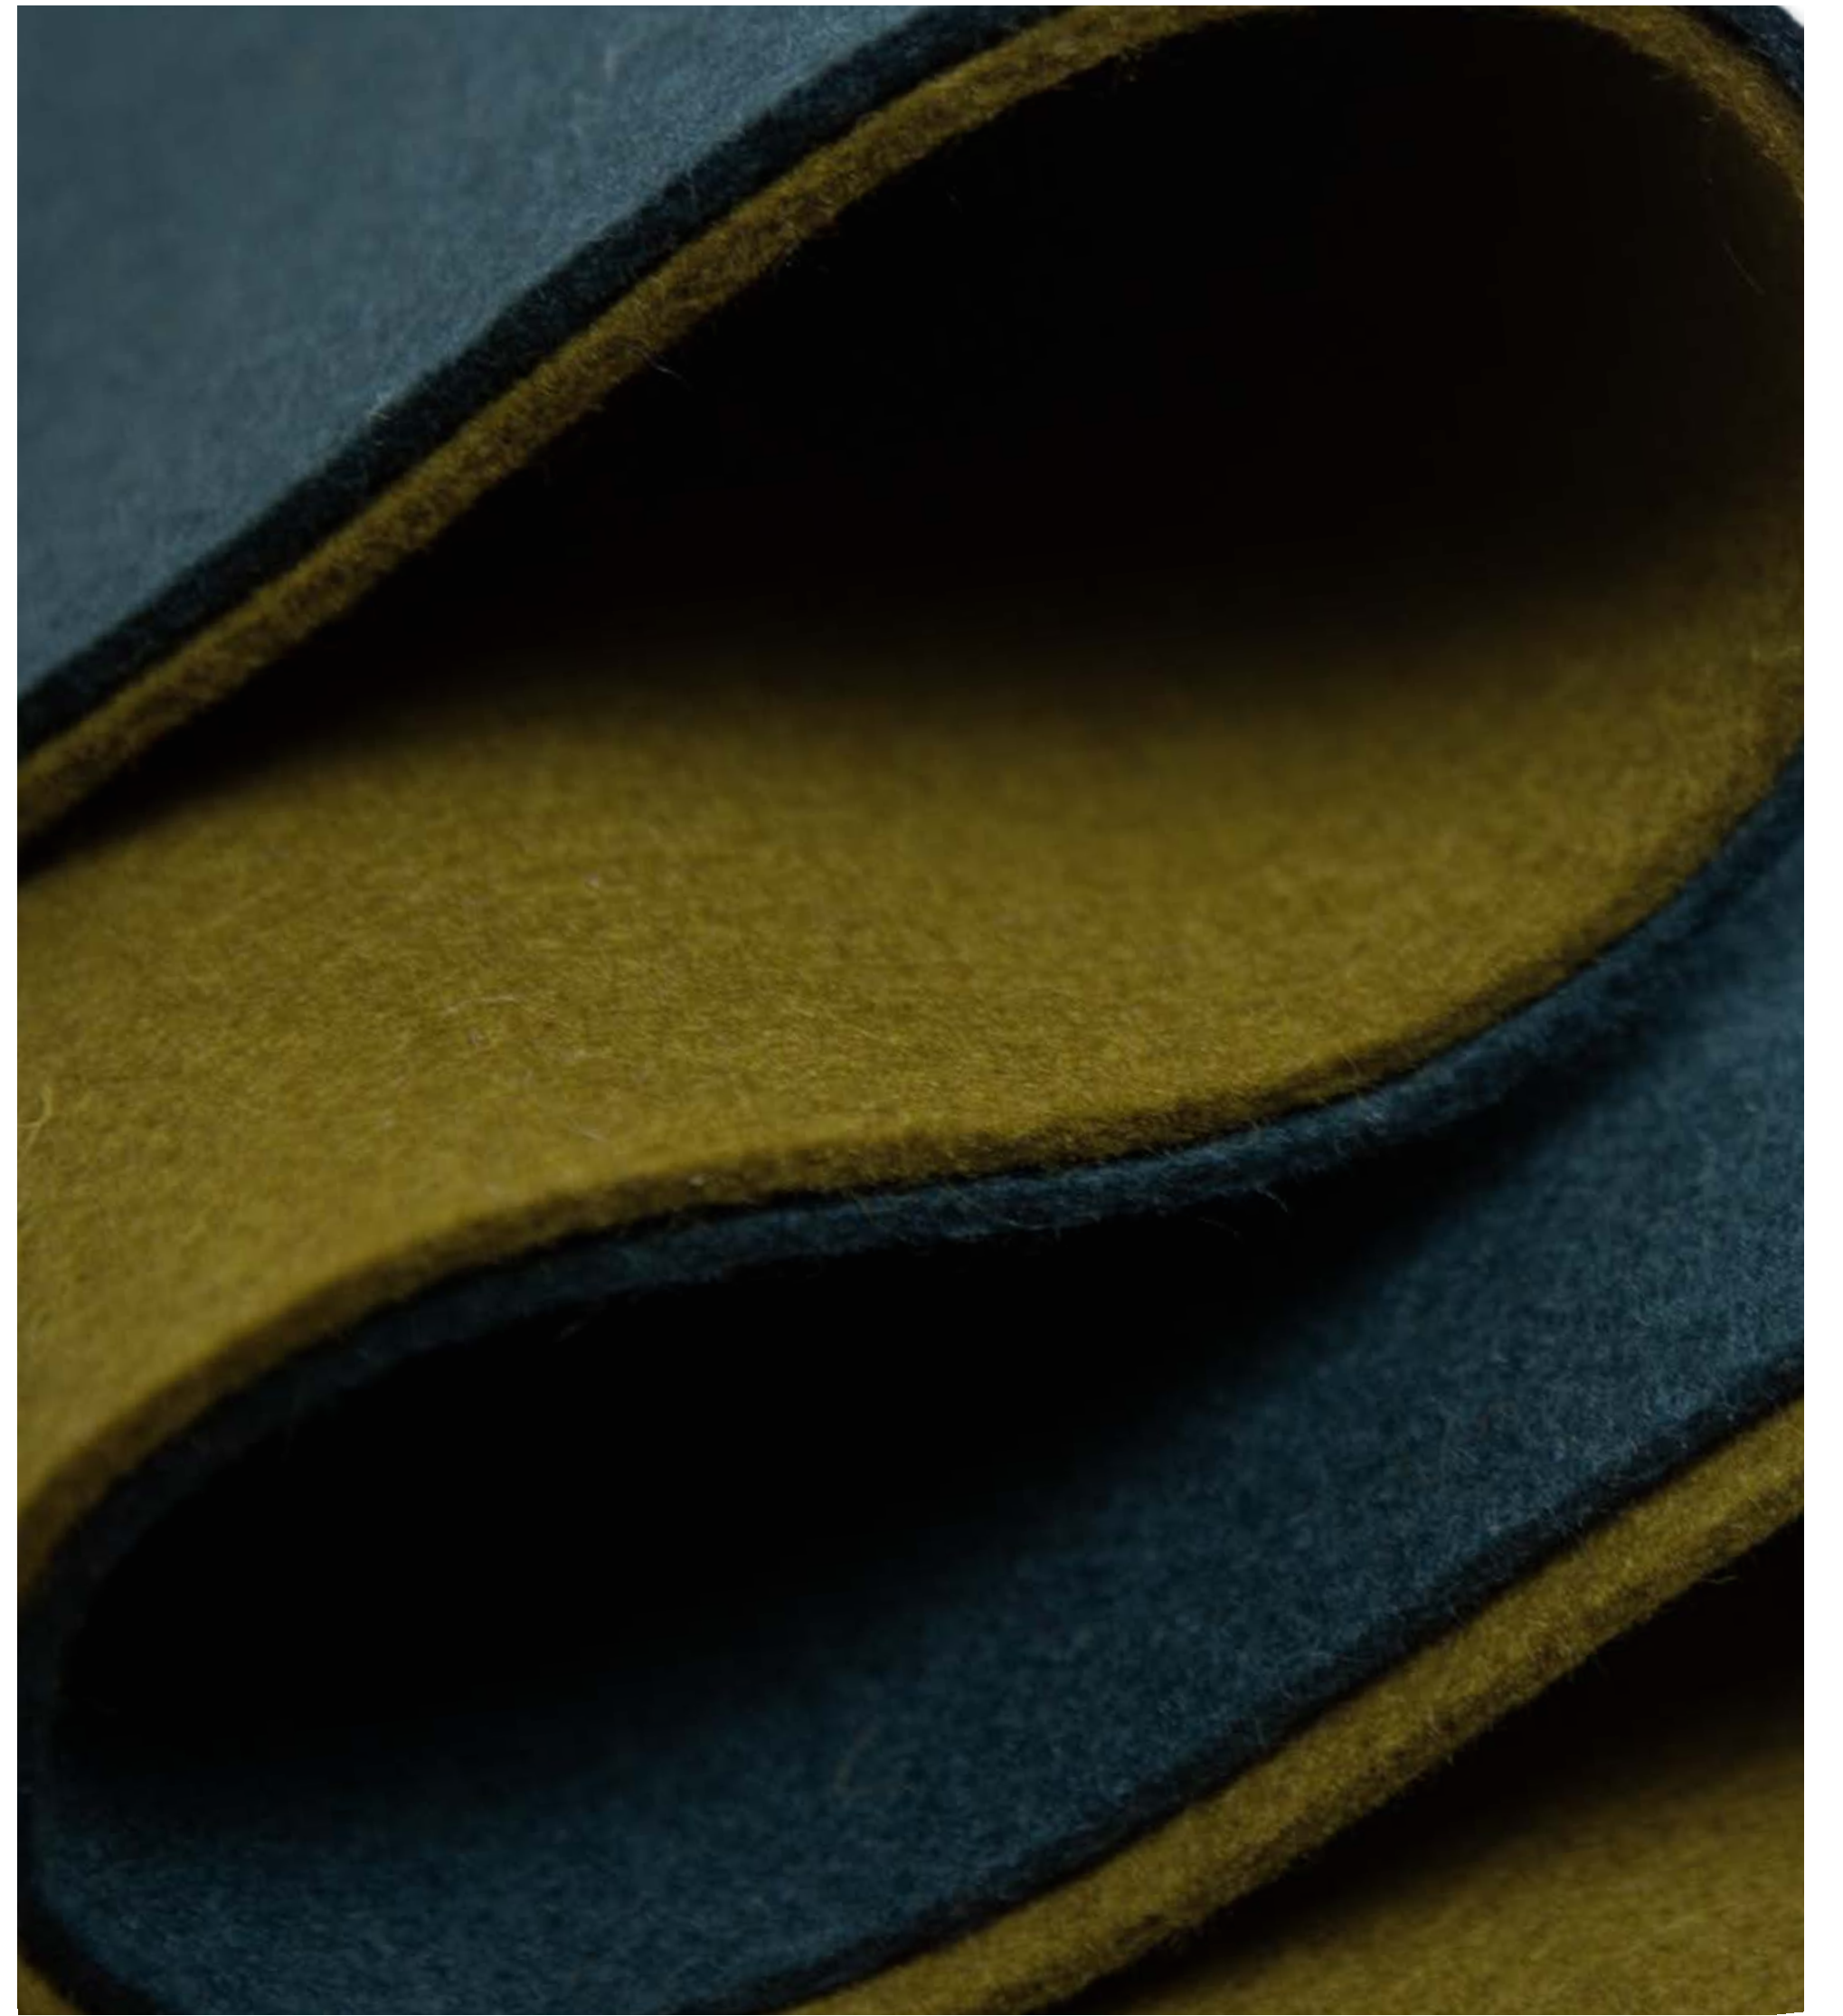

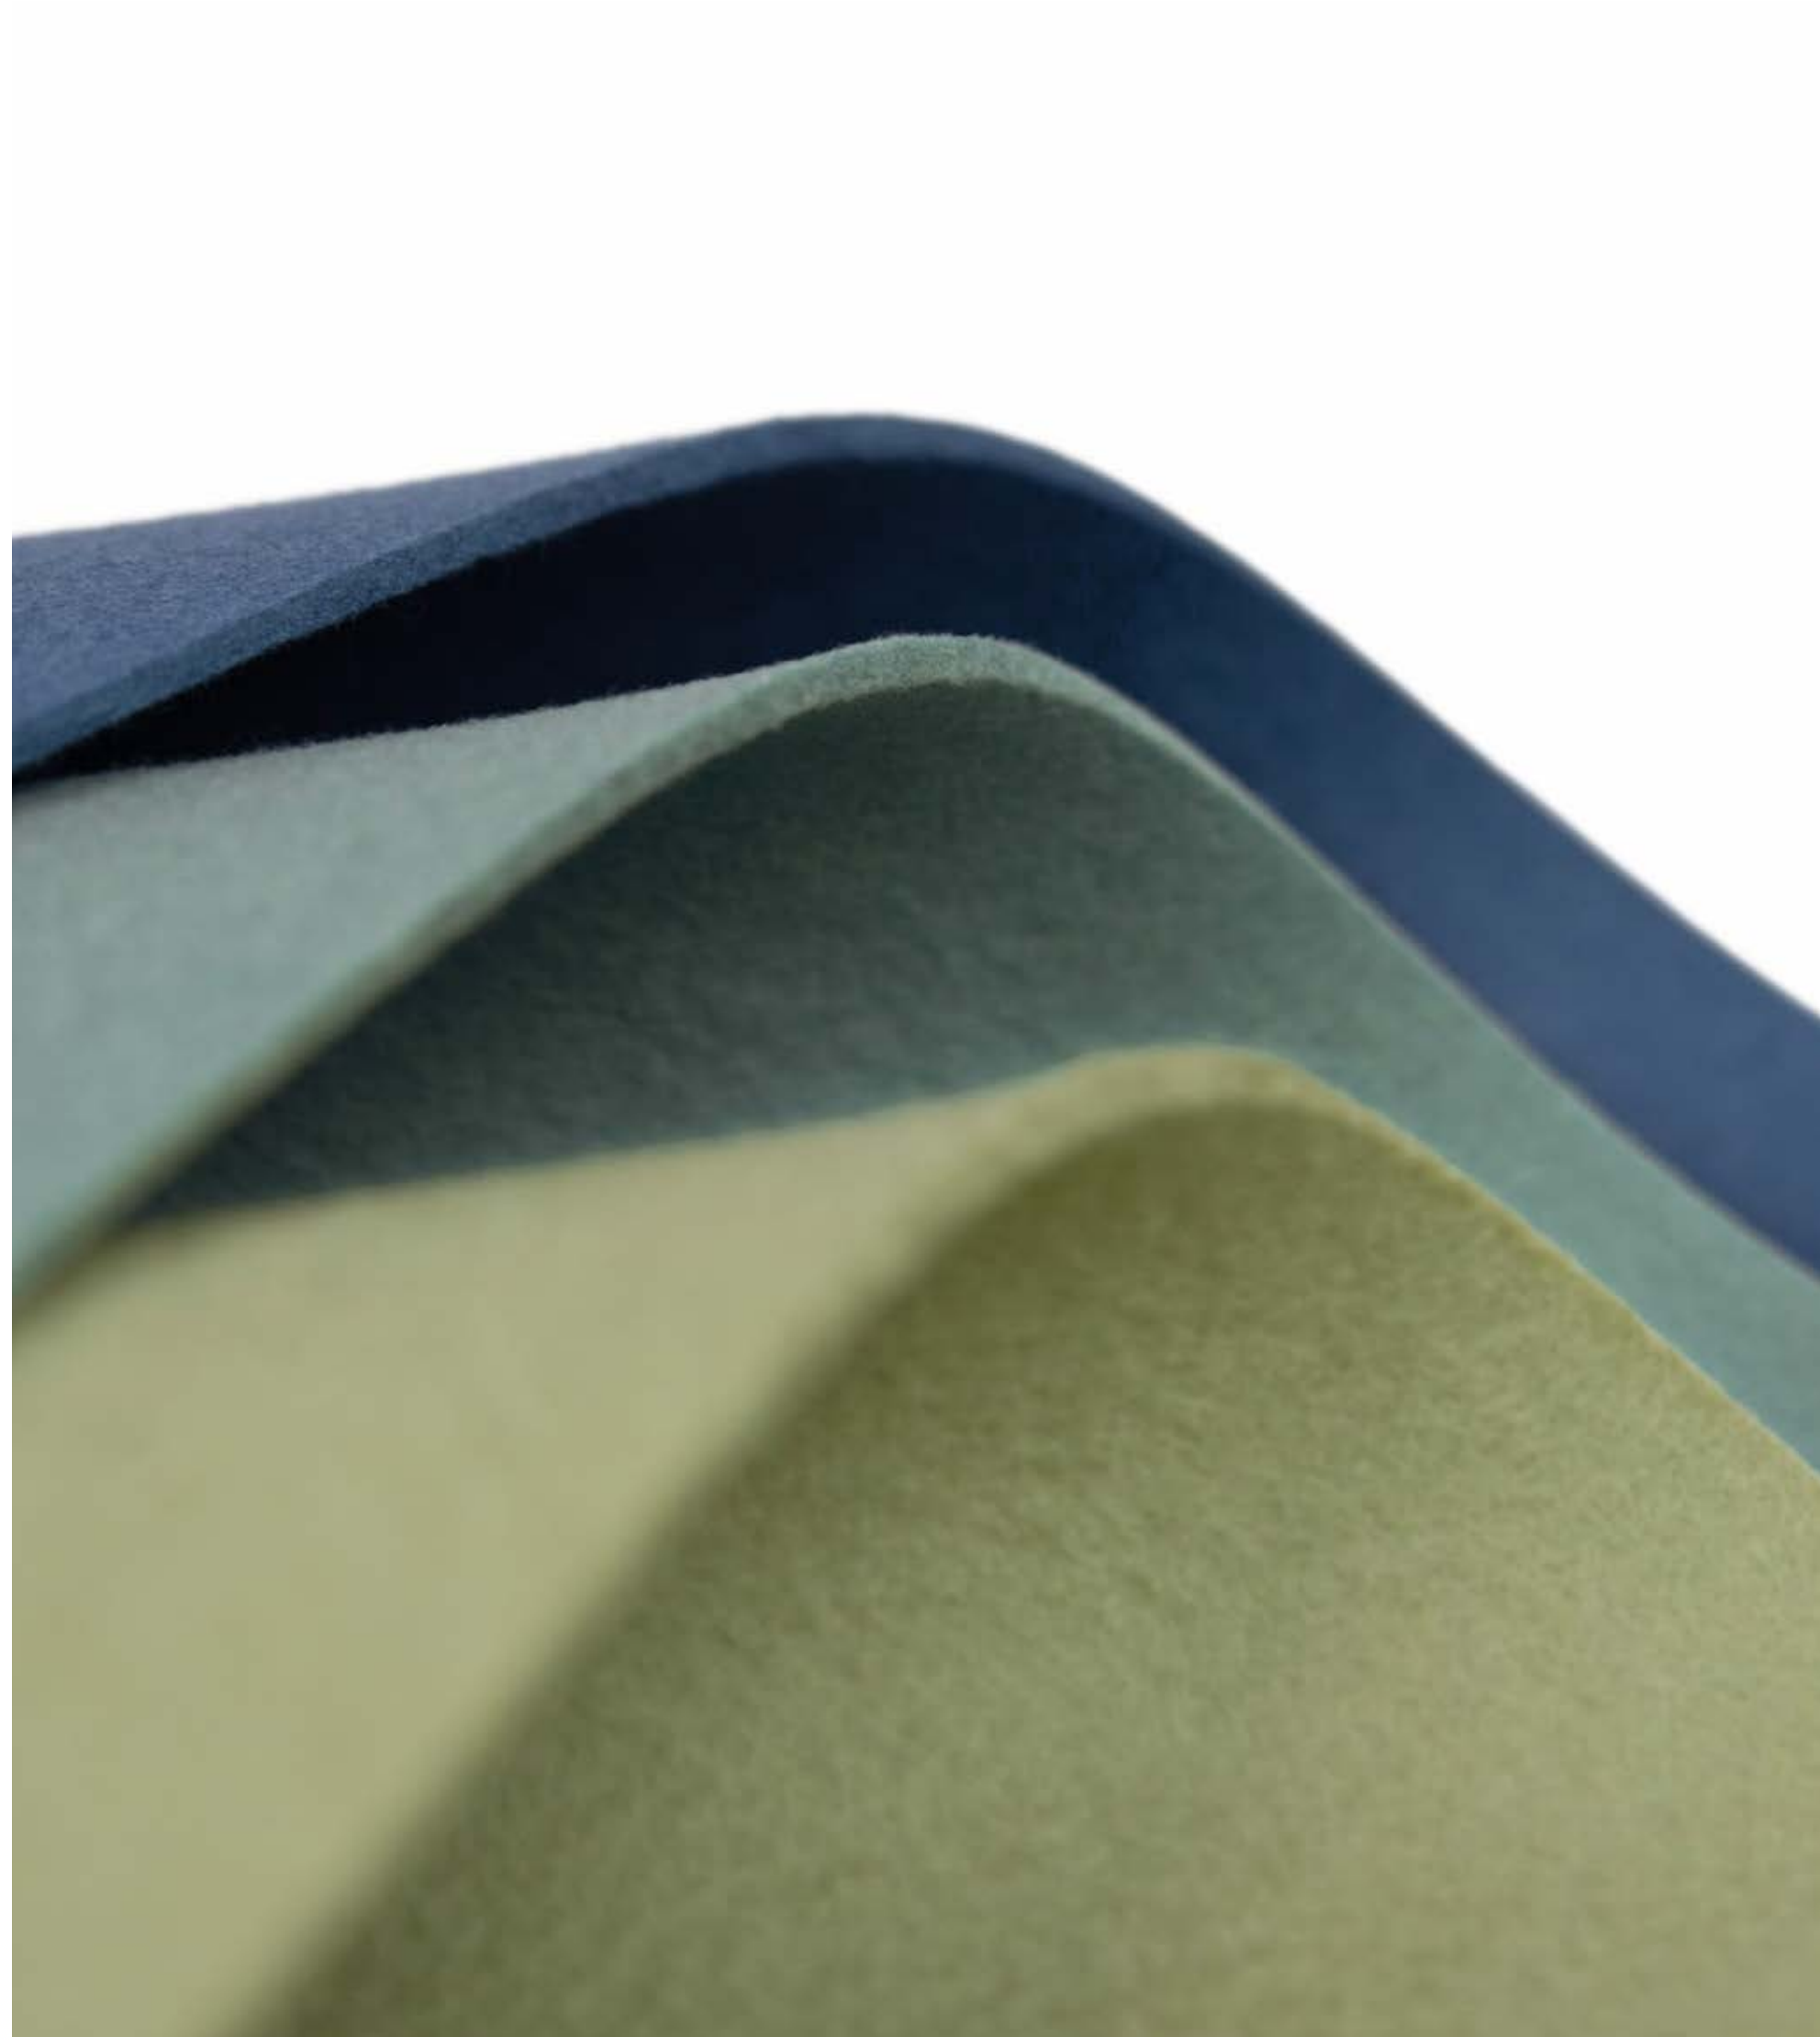

# Our Mission

For four generations, our family has refined our expertise in wool felt. We love to share our passion and values with architects and designers — and through them, the public.

## **Sustainability**

We pride ourselves on responsible sourcing and promoting wool's natural qualities as a renewable resource. As well, we are persistently reviewing our processes to ensure we are reducing our ecological impact in hopes of leading by example.

# Our Products

## Wool Designer Felt

A natural choice for designers, our signature product is made to feel. Available in a wide variety of colors and offered by the yard or roll.

## Raised Scapes

Created with designers in mind, with a variety of standard designs that are convenient to order, easy to install, and at a lead time that works.

## Linear Baffles

A popular acoustic solution that elegantly conceals unsightly ceiling features while enhancing the overall design of a space.

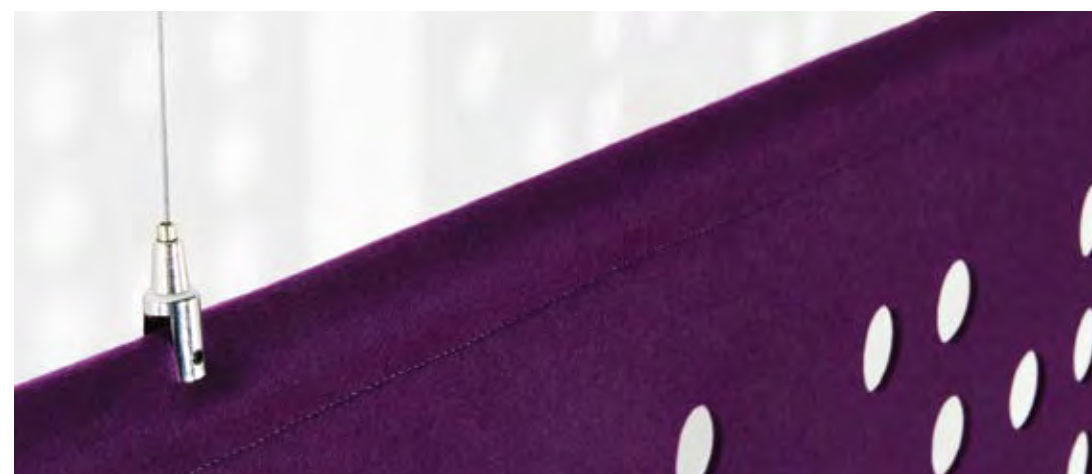

## Décor Tiles

This flexible product achieves design through a mixture of shapes, colors and pattern while allowing for the addition of soft finishes.

## Suspended Screens

Whether mounted on a sliding track or affixed in place, these screens are a fantastic way to transform spaces.

## Décor Panels

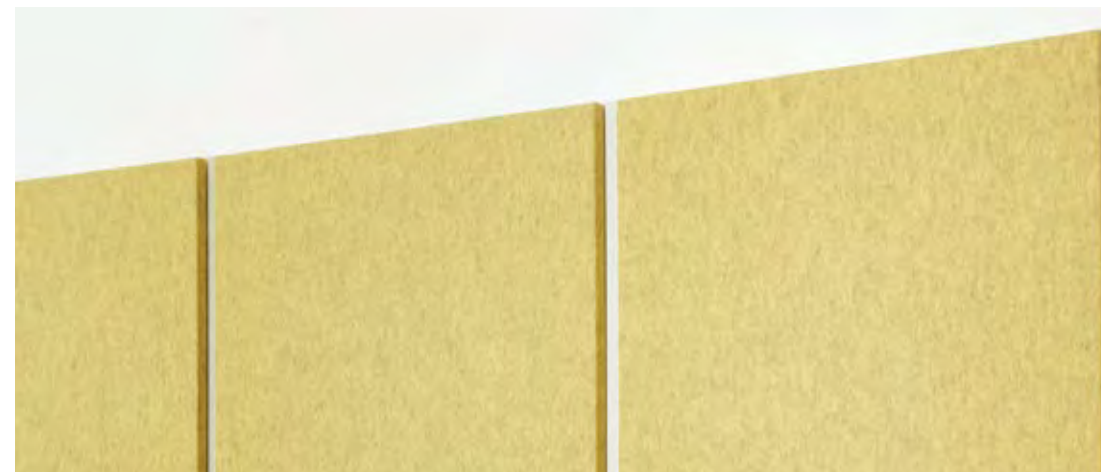

Perfect for adding uninterrupted soft finishes for spaces that would benefit from easy to install acoustic support.

# Our Products

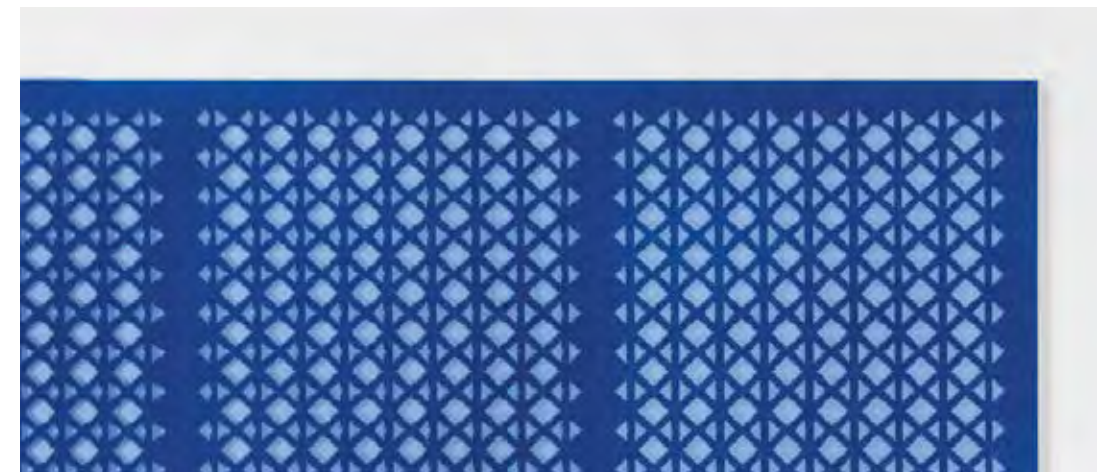

## Gallery Panels

Great for dampening sound and easily installed with our Z-clip system, these panels can give your wall a broad expanse of texture and color.

## Felt2Felt

A specialized product combining two layers of our Wool Designer Felt to give your designs depth, color contrast, and tactile allure.

# Specifications

## Unique Qualities

### General Properties

Wool Content: 100%  
Nominal Density: 0.30 g/cm<sup>3</sup>  
Standard Width: 3mm: 72" | 5mm: 70.9"

### Variation

As a natural material, there will be some expected variation within the fibers and color  
Visit [interiorfelt.com](http://interiorfelt.com) for more information

### Flammability

**3mm:** ASTM E 84: Class A (unadhered)  
CAN/ULC 102: FSR 25, SDC 175  
**5mm:** ASTM E 84: Class B (unadhered)

# Good to Know

## Variation

With wool felt being a natural material there may be natural variation within the material. This may include rare colored dots known as Smit Marks, color variation due to the natural wool color variation and the absorption of dyes, or fine vegetable matter. Complete color consistency is not guaranteed nor can it be expected, however if particular areas of a project site require higher consistency please inform us well in advance and we can do our best to accommodate by supplying similar dye lots when possible.

## Maintenance

Handle with care. To remove any accumulation of airborne particles, Interior Felt products can be occasionally vacuumed with an upholstery brush, brushed by hand or with a lint brush or roller. When dusting, it is normal to encounter a slight shedding of fibers. These loosened fibers are not a sign of any defect and will decrease over time.

Wet spills should be blotted up as soon as possible with a dry cloth. All wool fibers have a naturally-occurring fatty coating called lanolin. This substance makes wool water-repellent and provides inherent stain resistance. Felt is not waterproof, but its inherent resistance to liquids creates some delay time before spills soak through and cause a stain.

Other wet spills may be spot cleaned with warm water or a mild dry-cleaning solvent. Clean soiled areas gingerly to avoid warping the felted surface.

---

## Helpful Tips:

We strongly recommend testing any cleaning method on spare material or less visible areas first.

In addition to occasional dusting, felt products may need to be vacuumed once per year.

If stains cannot be removed with spot cleaning, we recommend seeking professional dry cleaning services that have experience with wool.

### Custom

We collaborate with designers and architects, offering our expertise to guide ideas from concept to creation through the unique possibilities of wool felt. As a non-woven material, felt lends itself to intricacy and elegance beyond the reach of other textiles—an ideal medium for refined, expressive design in a soft finish.

Custom thickness and colors available upon request.
